To whom it may concern

We at, Larsen & Toubro Ltd. are pleased to endorse that we have selected ITW GSE 2400 400Hz GPUs – 136 units - for the prestigious Midfield Terminal Building in Abu Dhabi, UAE.

Although, ITW GSE high quality and reliability products are already known among ourselves and our client, the compliance of ITW GSE with specific the technical project requirement was the deciding factor.

ITW GSE has assured a high voltage quality at the aircraft plug, irrespective of any make of 400Hz cable & Pit and thus L&T had the flexibility to procure the sub equipment directly from well-known other manufacturers.

Moreover, ITW GSE Project Management and Service team locally based has reacted promptly and professionally to provide adequate information and support to our On-site team.

Hence, this letter is to share appreciation with ITW GSE company, products and support.

Yours faithfully,

D. Sreedhar

Electrical Manager

L&T, MTA - ADAC project
