Subject Letter of reference – ITW GSE

To whom it may concern,

SATCO (Saudi Arabian Trading & Construction Company) confirms that we have worked with ITW GSE (formerly AXA Power) for more than a decade.

Over these years, we have supplied more than 180 pcs of airport ground support equipment in Saudi Arabia including 62 PCAs and more than 100 GPUs - Bridge Mounted - to all terminals at King Khaled International Airport in Riyadh, in addition to Taabuk & Arar Airports, all operated and maintained by SATCO.

ITW GSE's GPUs and PCAs are easy to use and highly reliable. This is proven by the uptime of 99% on more than 250 flights operated daily. ITW continuously develops their product line with innovative features to meet the requirements from the Airport industry.

We appreciate ITW GSE's know-how, their fast and positive reaction as well as the open-minded and trustful communication between our companies which makes us very confident in the company and their products. We will be happy to use ITW GSE products again.

Sincerely,

Joseph C. Jamhuri
Senior Vice President, ASD & Logistics.
